

# Day 3 journal entry

Sahil Thadani

**Prompt option 1:** *How has your classroom experiences prepared you for the internship? What do you wish you had learned prior to the internship?*

Some experiences with my robotics team in high school, and simple coding classes as well have prepped me for this internship. Both of them gave me experience with github, and knowing the insides and outs of git have already helped me. I wished I knew some more html before, since it would have allowed me to progress on my website faster. Other than that however, school hasn't prepped me for this type of internship and work environment very much, and I'm very excited to learn more about this company than I already have.

Choose 1 of the following prompts to respond to and then delete the prompt(s) that you did not choose.

**Prompt option 1:** *What is a topic that you found interesting this week? How do you plan to seek additional information and learn more about that topic?*

This week, I found the topic about speaking and presenting, as well as the presentation on the future of AI, very fascinating, since speaking and presenting is something I'm trying to get better at, and AI is something I'm really passionate about. I plan to reach out via email and thank them for the presentation, and ask for more tips about their respective presentation topics.

**Prompt option 3:** Describe a challenge you encountered during your internship and how you approached overcoming it. What did you learn from this experience?

A big challenge I faced during my internship was the process of accessing photos locally for my website. I couldn't get the photos from my own device onto my website. I ended up trying multiple browsers and asked friends for help, and it ended up working. From this I learnt that there isn't always one way to get to a solution, because I was stuck on one browser. I learned that it's important to keep an open mind and listen to friends to attack problems and challenges you face.

# Day 8 journal entry

**Prompt option 3:** *If you could give advice to a student starting this internship next year, what would it be?*

Be ready to ask questions to learn. So many people here have different backgrounds and are willing to share what they know and connect, you just have to be ready to do your part, engage, and ask questions.
