

Mya Evans

Prompt: How has your classroom experiences prepared you for the internship? What do you wish you had learned prior to the internship?

My classroom experiences prepared me by showing me common mannerism, math skills, reading skills, digital art, marketing, PLTW classes and more. I wish I would have learned how to code prior to this internship because I don't have any experience in that, but it's very nice to learn.

Prompt: What are your main takeaways from this first half of your internship and how do you plan to carry those lessons into your second week?

From the first half of my internship, I learned that it's important to communicate well with my team, manage my time, and ask for feedback. Talking with my teammates helps me understand what to do. Managing my time helps me finish work on time. Getting feedback helps me improve. In my second week, I will keep talking with my team, plan my tasks each day, and ask for feedback often. I also want to share my ideas more in meetings. This will help me learn and do better during my internship.

Prompt: How is the internship meeting or not meeting your expectations/objectives and why? Do you have control of this? Explain.

The internship is mostly meeting my expectations because I am learning new skills and getting real work experience. I expected to work on meaningful tasks, and so far, I have been able to do that. Sometimes, I wish I had more challenging projects, but I know that will come as I gain more experience. I do have some control over this because I can ask for more tasks or help when I feel ready. I plan to communicate more with my supervisor to make sure I get the best experience possible.
