

Day 6 journal entry

Tyler Parker

Prompt option 2: *Who have you met during your internship that has made an impact on you, and why?*

My assigned college intern mentor has greatly impacted my perspective on the development of my programming/software development knowledge over time. Despite my interest in entering the software engineering industry, I've always felt overwhelmed by my lack of knowledge and the perceived amount of content I would need to learn in just a few short years. My mentor explained that he didn't even start programming until his freshman year of college, and that through his classes, he "went from zero to hero" very quickly. This reassurance reaffirmed my desire to enter the software development industry and continue to pursue my interests that relate to that field.
