Daniella Menelas

Prompt: **What is a topic that you found interesting this week? How do you plan to seek additional information and learn more about that topic?**
A topic I found interesting are coding and computer languages. Before this I knew nothing about coding and computer language, it was never something I was interested in, but going into it now, it's really interesting and i want to learn more about it. A way i plan to seek additional information of these topics are contacting people in that department either through Slack or Linkedin

Prompt: **Describe a challenge you encountered during your internship and how you approached overcoming it. What did you learn from this experience?**
A challenge I have encountered during my internship is getting into coding and coding language. Before this internship I had no experience with coding or anything in that category, so coming in with no experience is very hard, but everyone around me was a lot of help and made it easier. Something I learned about myself is that I enjoy coding and will probably turn it into an interest outside this internship.

Prompt: **If you could give advice to a student starting this internship next year, what would it be?**
My advice would be that there's nothing to be nervous about,it's okay to ask questions, no right or wrong questions, take lots of notes, listen, also make connections and seek out opportunities,and be yourself but also professional, lastly have fun!!
